Homeopathy Under Attack

- Legislation against funding
- Studies disproving homeopathy works
- Lack of Clinical Data – scientifically acceptable data – for the time
- Studies in favor of homeopathy – too small
- Many studies not devised well – engineered to reach positive conclusions?

Homeopathy – Warped in Time?

- Texts – written in the 19th Century and early 20th Century
- Deviation from texts is generally not accepted
- Relic of a science two hundred years old
- Elaborate theoretic explanations for everything
- Resting on laurels of the Founders

Do we need to do anything?

- Don't rise to the bait?
- Millions of followers as it is – testament enough?
- Today's science can't prove it?
- We were scientific in the 18th century
- Unfair demands being made of homeopathy

Clear and Present Danger

- Rapidly - losing government funding
- Illegal to stop conventional medicines
- Negligence filed for choosing alternative medicine
- Libel filed for criticizing conventional medicine
- Homeopathy left as last and desperate option

Latest Tools and Homeopathy

- Variations in laboratory tests which define patients suffering – have little mention in the texts
- Markers of disease and disease progress are ignored
- Inability to use important diagnostic data in prescription
- Emerging clinical entities – ill defined in our texts

Confounding Variables

- Different Remedies for the same case
- Difference in use of single or multiple prescription
- Difference in potency selection
- Difference in repetition of doses
- Validation of these differences?
- Many 'philosophies'

Advanced Homeopathy

- Roots in Dr. Pareshnath Banerji's Homeopathic Practice, 1918.
- Formalised by Dr. Parimal Banerji, 1976
- 18 million prescriptions served, to date
- Several thousand prescriptions served, every day.
- Combating emerging clinical entities and understanding the changing faces of the ones we know of already.

Advanced Homeopathy - Roots

- Explosion of popularity of charitable practice
- Need to devise ways of quick prescription
- Complete absence of all other medical care in the vicinity
- Inability to turn patients away
- Compelled to take up serious cases
- Handling 2500 cases a day

Advanced Homeopathy

- Reduces the variables of conventional homeopathy
- Simplification of Drug and Potency Selection
- Clinical data spread over 91 years utilized
- Statistical analysis of different homeopathic medicines at different potencies for a given condition
- Gives a specific medicine at a specific potency for given conditions

Advanced Homeopathy

- Shows that certain proved symptoms of a drug are never cured in patients
- Different spheres of action at different potencies of the same drug
- Validation of specific symptom groups of particular potencies.
- Homeopathic medicines combinations, given in alternation, may significantly improve cure rates for specific conditions.

Advanced Homeopathy

- Quick Selection of drugs, with known effective potency
- Second line of treatment, known to be effective if first line fails
- Each stage clinically validated and statistically analyzed
- Used in critical care with minimal time loss

Constant Evolution

- Contributions from botanists, statisticians and physicians
- Findings presented at International Forums
- Driven by the need to support a rather large patient base
- Can continue to contribute to the science in general

Thyroid Swelling

- Painless, non tender and firm in consistency
- No discomfort in deglutition or dysphonia
- **Mercurius Vivus 200c** and **Conium Mac 3c**, usually once a day each
- Average of 30 Thyroid cases seen per day at the Clinic

Hepatic Ascites

- Rapidly progressing in nature
- Severe discomfort for the patient
- **Bryonia Alba 30c** and **China 200c**, alternated every 2 hours or at a higher frequency
- Average of 10 cases of liver disease is seen at the Clinic everyday.

Psoriasis

- Source of stigma and great physical discomfort
- **Antimonium Crudum 6c** and **Arsenic Album 200c** greatly improves most cases

Psoriasis

- One dose each, every day
- Alternated twice daily in rapidly progressing cases
- Works well in different forms of dermatitis, also
- An average of 20 cases of psoriasis seen every day at the Clinic

The Struggle Within

- Deviating from principles?
- May not conform with many 'hypotheses'
- Conforms with original homeopathic principles
- Conditions treated with homeopathy alone, many times over
- Worried about homeopathic 'effects'?

Clarification

- Advanced Homeopathy is not fail safe
- There are a wide variety of protocols that need to be understood, some times for one single illness
- Rates of success with patients significantly improved
- No deviation from the simple, easily comprehensible principles

Advanced Homeopathy

- Definitive remedy and potency selection
- Definite second line of treatment
- Definite basis for repetition of dose and how
- Based on clinical information, validated and revalidated.
- Only basis are its patients. No theories and hypotheses.

'If you believed that there is a bond,
Between our future and our past,
Then try to hold on to what we had,
We built 'em strong, we built to last.
This is a mighty town,
Built upon solid ground,
And everything they tried so hard to kill,
We will rebuild.'

- Jimmy Nail
